

2 MINUTE PEARLS

Health History Module

- Is AHLTA too slow? Are you tired of watching the hour glass every time you want to look for clinical information?
- Do you wish that you could see all relevant patient information on one page (Problem List, Medications, Previous Results, Previous Encounters, etc...)?
- Would you like to be able to quickly access more detail about particular clinical items without the usual delay?
- By using the **Health History Module** and making a slight change to your clinic work flow, you can have a patient's health information at your fingertips and navigate more quickly through a patient's record.

(If you would like to receive future versions of the AHLTA 2 Minute Pearls directly, please email Lakia Brockenberry at Lakia.Brockenberry@us.army.mil to be added to the distribution list)

Health History Module (HHM)

- Use **Health History** to generate a snap shot of a patient including
 - Patient's Problem List
 - Medications/Allergies
 - Test results (Labs, X-rays)
 - Vital Signs
 - Previous Encounters and Clinical Notes
- Information in your HHM is customizable
- By opening the HHM at the beginning of an appointment all future data retrieval on that PC for that patient's encounter will be faster.
 - Trade off is an initial delay while loading this module (ideally you should load the HHM while starting to talk to the patient so it can load while you are doing something else)
- Requires one time configuration of HHM and data retrieval settings.

New Edit

Initial Setup and Editing of the Health History Module

(Only have to complete set-up one time and settings will remain permanent)

If you have never edited the HHM, you will see this window. Click OK and then select the Options button.

OPTIONS

Health History

No Modules have been selected for Health History. Use 'Tools' - 'Properties - Health History' to select modules for display.

OK

Configuring Data Retrieval Settings

- This one time set-up is essential since it allows you to choose how much information you get back when you utilize the Health History Module
- Should set the following areas
 - Radiology
 - Lab
 - Clinical Notes

Setting the Radiology Filters

- Go to Radiology Module of a patient
- Select **OPTIONS**

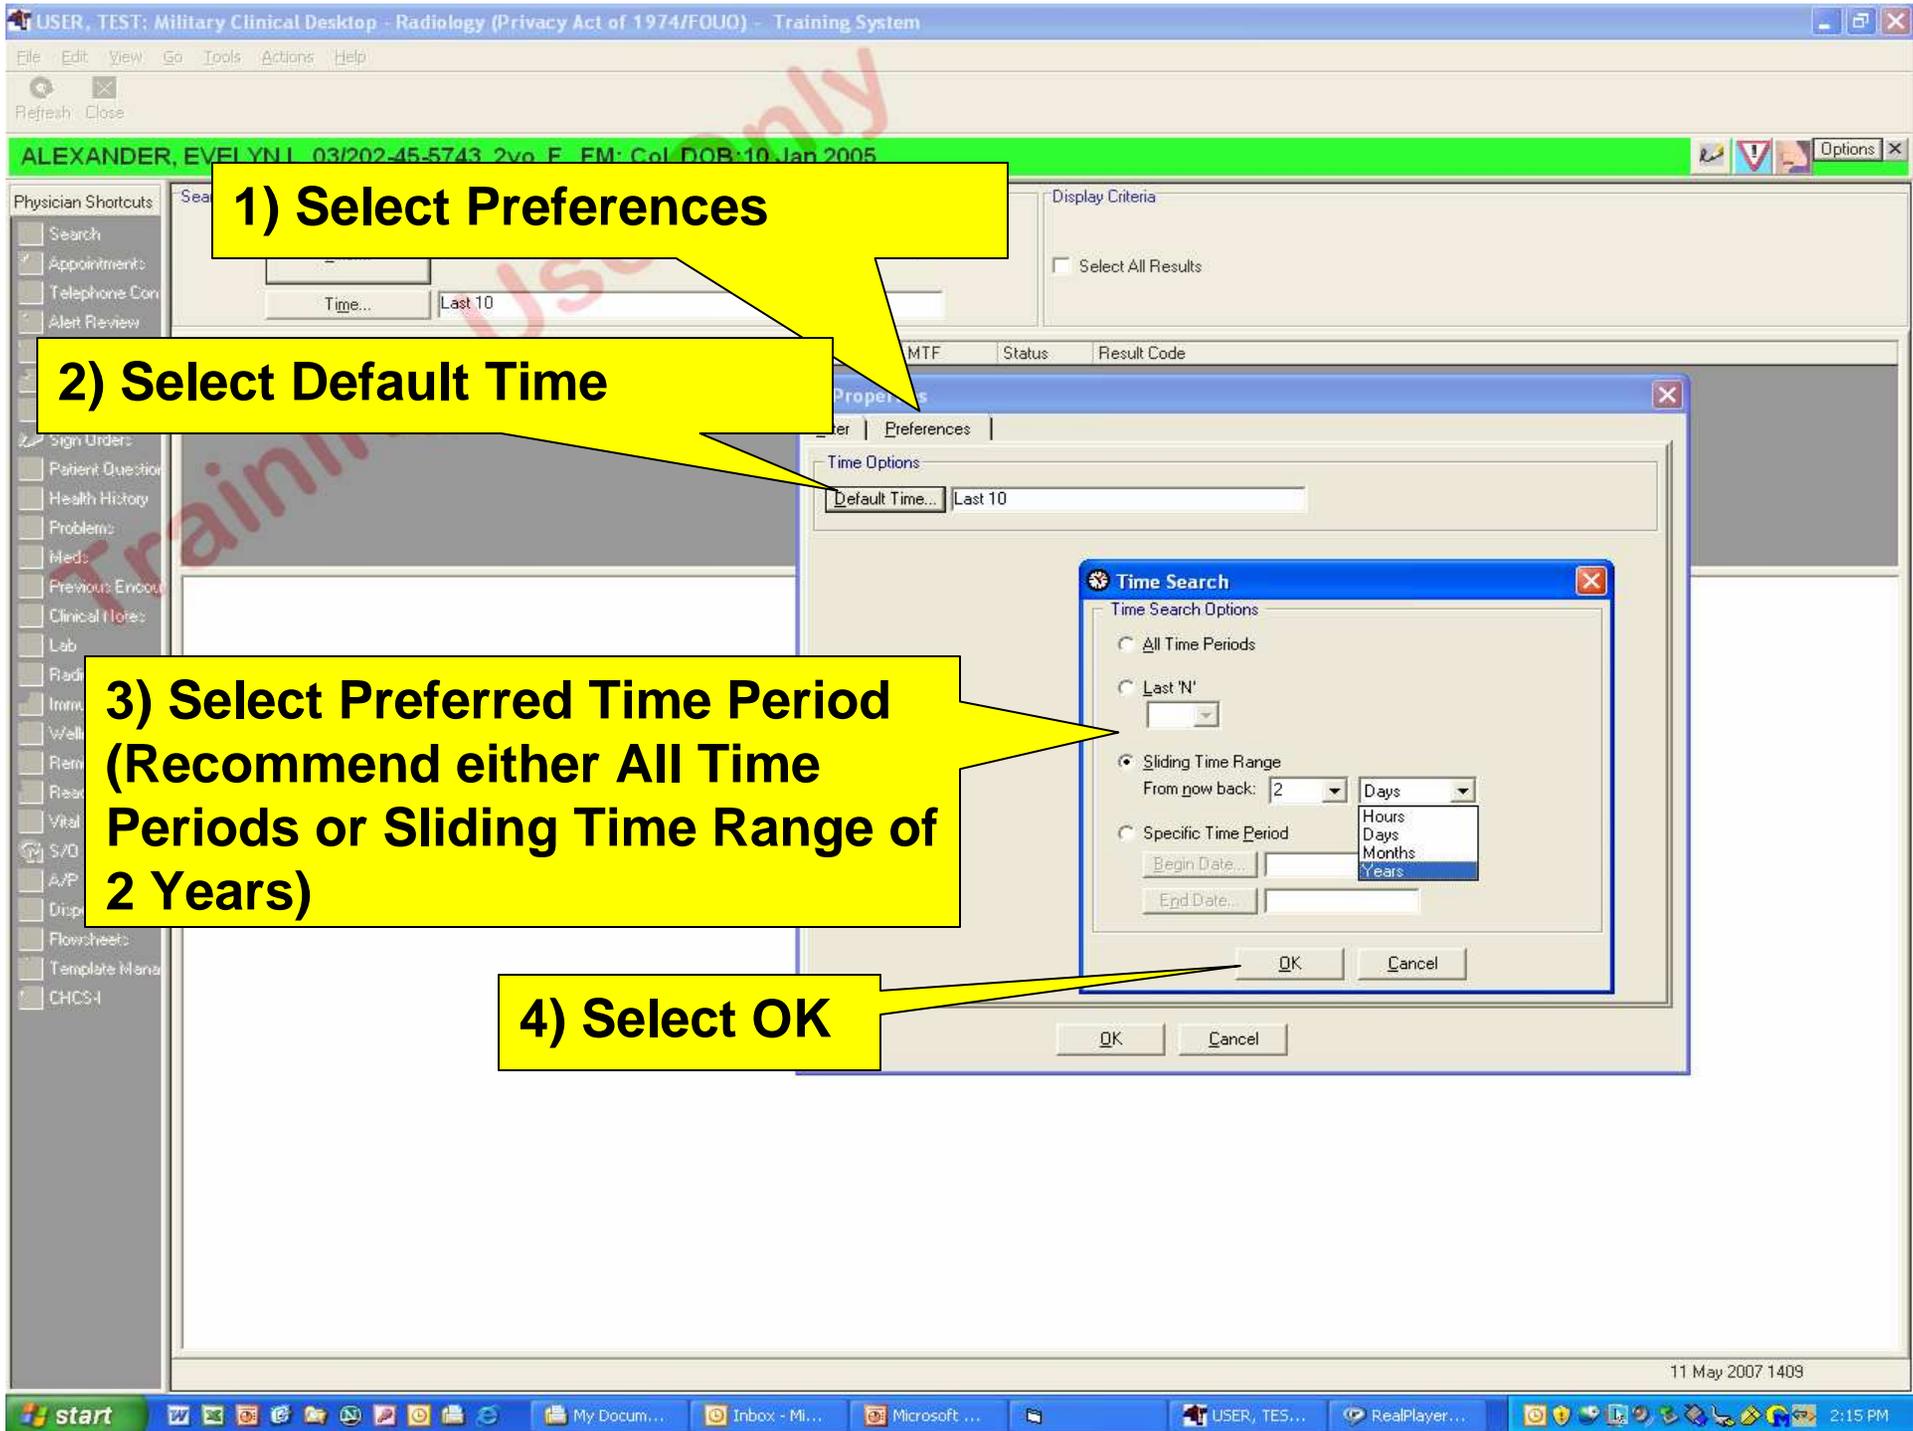

- File Edit
- Refresh
- ALEX
- Physician
- Search
- Appointments
- Telephone Cons
- Alert Review

Setting the Clinical Notes Filters

- Go to Clinical Notes module of a patient
- Select **OPTIONS**

1) Select Preferences

2) Select Default Time

3) Select Preferred Time Period
(Recommend either All Time Periods or 2 Years)

4) Select OK

The screenshot shows a Windows desktop environment with a clinical notes application. The application window title is "USER, TEST: Military Clinical Desktop - Clinical Notes (Privacy Act of 1974/FOUO) - Training System". The application interface includes a sidebar with a tree view containing items like "Sign Orders", "Patient Question", "Health History", "Problems", "Notes", "Previous Encounters", "Clinical Notes", "Lab", "Radiology", "Immunizations", "Walk-in", "Reminders", "Reservations", "Vitals", "S/O", "A/P", "Disposition", "Flowsheets", "Template Manager", and "CHCS-I". The main area displays a patient record for "CHCS II TT Facility". A red box highlights the "Options" button in the top right corner. A yellow callout points to this button with the text "1) Select Preferences". Below this, a "Properties" dialog box is open, showing "Filter" and "Preferences" tabs. The "Time Options" section has a "Default Time..." dropdown set to "Last 20". A "Start Up Mode" section has "Regular" selected. A yellow callout points to the "Default Time..." dropdown with the text "2) Select Default Time". A "Time Search" dialog box is also open, showing "Time Search Options". It has three radio buttons: "All Time Periods", "Last 'N'", and "Sliding Time Range". The "Sliding Time Range" option is selected, with "From now back:" set to "2" and "Years" selected in the unit dropdown. A yellow callout points to the "Sliding Time Range" radio button with the text "3) Select Preferred Time Period (Recommend either All Time Periods or 2 Years)". The "Time Search" dialog also has "Begin Date..." and "End Date..." fields. A yellow callout points to the "OK" button in the "Time Search" dialog with the text "4) Select OK". The Windows taskbar at the bottom shows the Start button, several application icons, and the system tray with the time "3:24 PM".
