### Microphone:

- Go to sleep/Wake up
- Microphone off
- Press {Hot Key}

### Selecting:

- Select <text>
- Select <text> through <text>
- Select next/last/previous line, character, or paragraph
- Select all
- Unselect that
- Spell that
- Train that

### Correcting Selected Text:

- Choose <word> from dropdown
- Spell That
- Train That

### Inserting Lines:

- New line/paragraph
- Press enter
- Press tab

### Capitalizing:

- Cap that
- No/all caps that
- All caps on/off

### Editing:

- Cut/copy that
- Copy all to clipboard
- Paste it here

### Deleting:

- Scratch/delete that
- Delete <text>
- Backspace

### Moving Around:

- Insert before/after [word]
- Move left <number> words
- Move down <number>
- Go to start/end of line
- Page up/down
- Go to top/end

### Other Stuff:

- 1 = numeral one
- " " = Open/Close quotes
- ( ) = Open/Close paren
- [ ] = Open/Close bracket

### Creating a Voice Shortcut:

1. Select/highlight desired text (e.g. physical exam text)
2. Say: "Make that a shortcut"
3. Say: "Insert normal physical exam" (substitute above with command you can remember)
4. Say: "Save"

Now, every time you say "Insert physical exam", the text you highlighted in the first step will be typed automatically
