Referring Provider: MARSHALL, ROBERT C
Date of Request: 24 Nov 2006
Priority: Routine
Provisional Diagnosis:
tingling (paresthesia)
Reason for Request:
Pt is a 40y/o WF with chronic back pain and now with paresthesias in the right lower leg to the top of the foot. Recently evaluated by one of our DO's who felt that she needed an MRI to r/o HNP before more OMT could be done. Thank you.
This is the displayed list if you choose the “Consults from Me” radio button. This is probably the preferred view for most PCM’s. AS you can see, clicking on the consult displays the consult, and can display the completed consult as well.
