PRESENTATION ON AHLTA:

Usability Strategies Regarding AHLTA

Anthony Inae M.D.

tony@inae.net

AHLTA Conference 2008

June 3-6, 2008

Hyatt Regency Phoenix, Phoenix, AZ

Goals for the Presentation

To show you how to....

1. Document quickly, easily, effectively and legibly
2. Receive appropriate credit for what you do
3. Understand what others have done to streamline workflow
4. Go home on time

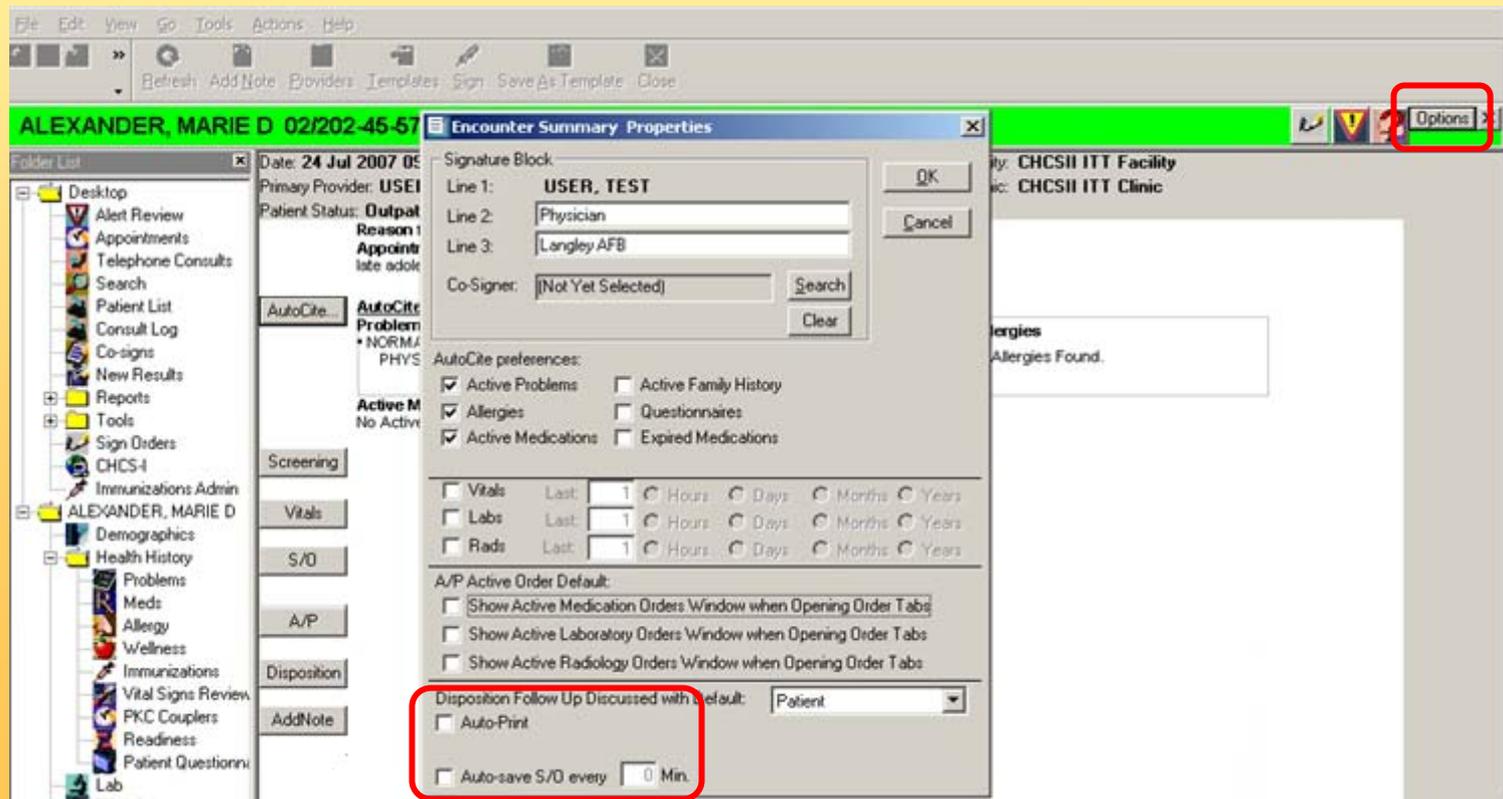

Outline

- Things to setup and know before using AHLTA
- The skinny on Coding
- Optimizing your Support Staff
- Documenting quickly with the Usability AIM Form
- How others have made it work using the Team
- Adding the Usability AIM Form to you're my Favorites List

Turn off Autosave and AutoPrint

User Preferences

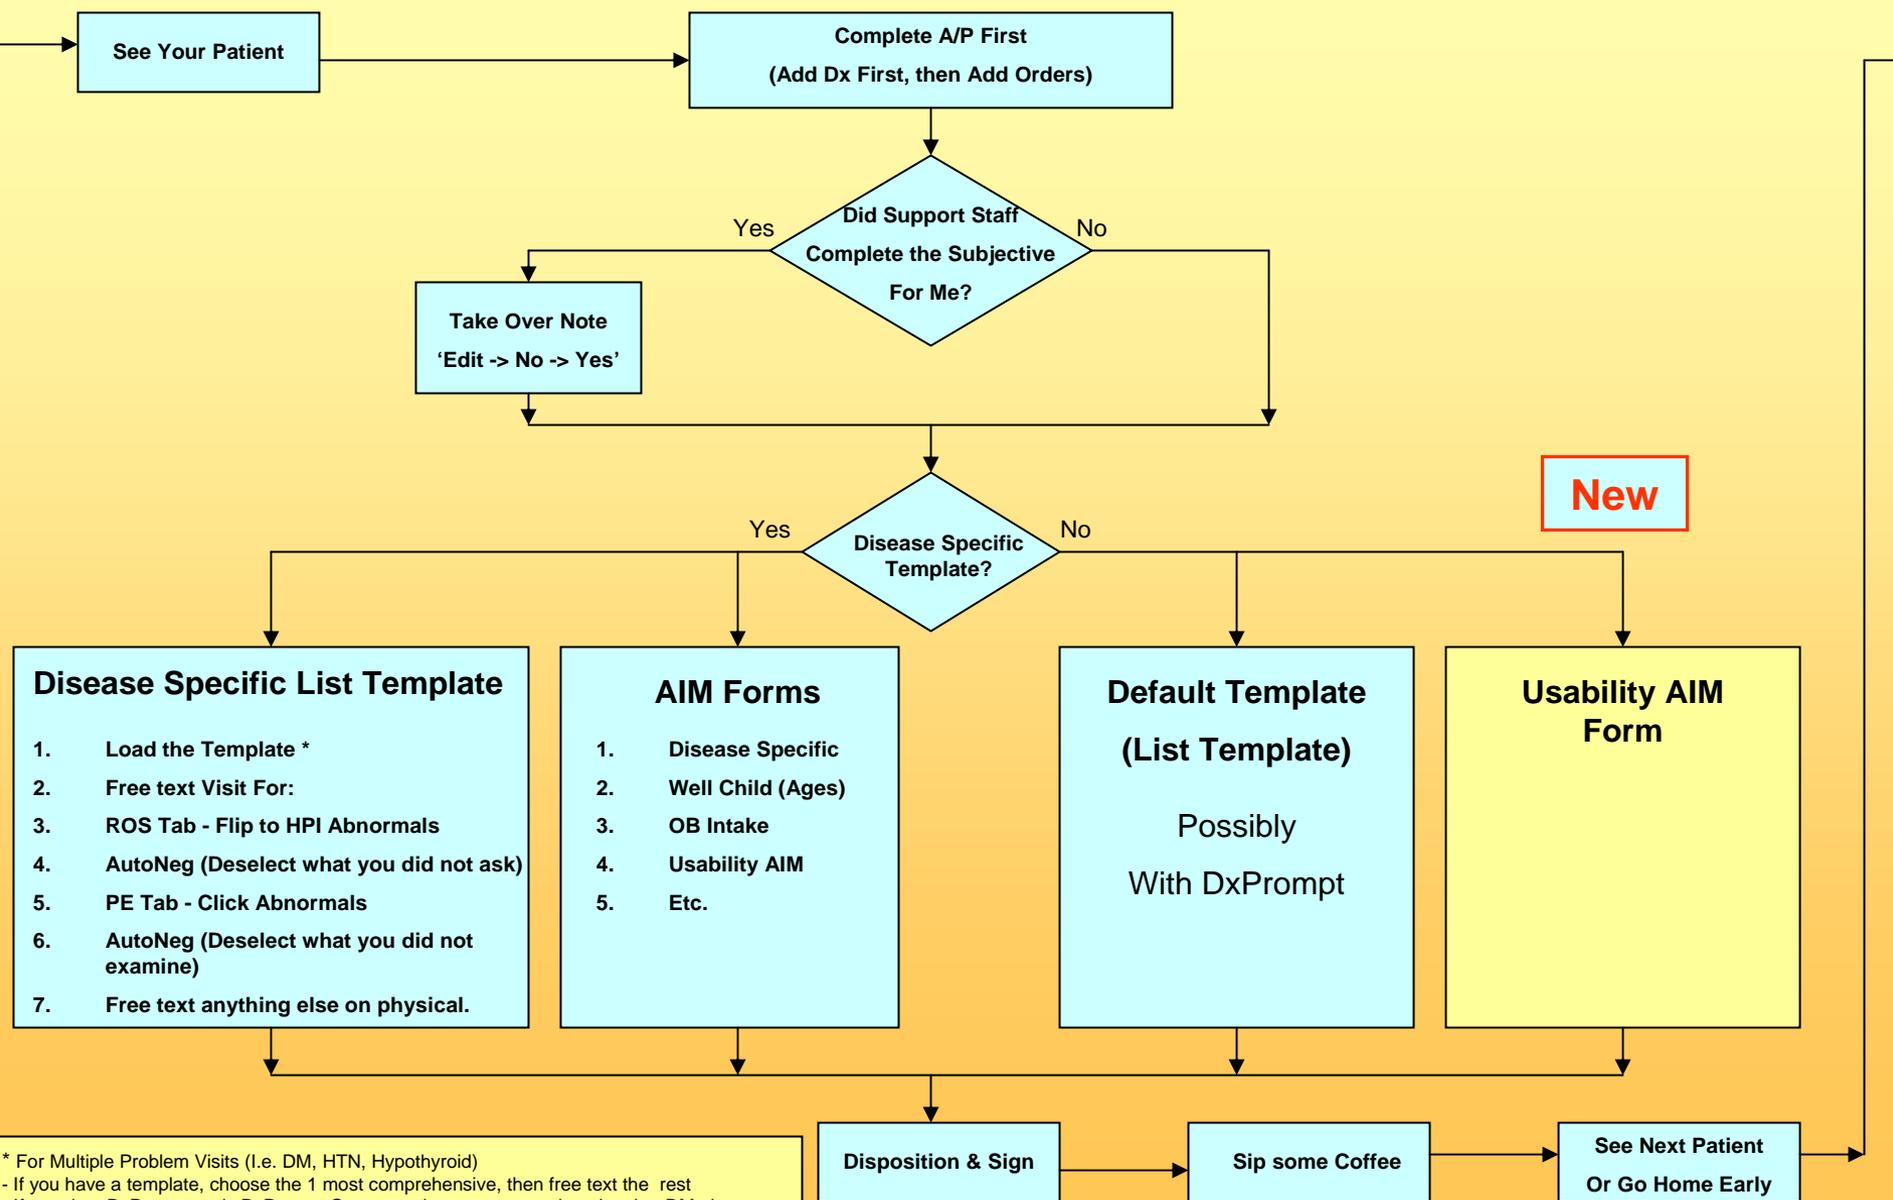

- You can get to this options box by clicking “options” while in the SO module

Default Encounter Template

- A template that loads for every patient, every encounter automatically to pre-stage
 - Diagnoses (only your most common and hard to find)
 - Procedures (possibly **all** the CPT codes you use)
 - Labs (possibly **all** the most commonly used by you)
 - Meds (only the most common, if at all)
 - Radiology (only the most common)
 - Other therapies (patient education documentation)
 - Most commonly used MEDCIN items (not on your AIM form)
 - Procedure notes (canned text blurbs)
- Use for documenting **all** other visits that don't have a template

General Workflow Documenting Note in AHLTA

* For Multiple Problem Visits (I.e. DM, HTN, Hypothyroid)
 - If you have a template, choose the 1 most comprehensive, then free text the rest
 - If you do a DxPrompt, only DxPrompt Once - on the most comprehensive, I.e. DM gives terms that can be used to document HTN and Hypothyroid, etc.

Copy / Paste

Copy / Paste

- “CTRL C” and “CTRL” V are your friends
- Right clicking (copy / paste) not always an option
- **Useful for X-Ray comments, Consult reasons, A/P comments to be reused in “S/O Visit For” to document what you just typed then edited down**

CTRL C = Copy

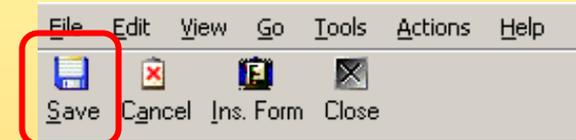

CTRL V = Paste

Adding Cell Phone

Demographics Comments

- Cell phone number here
- Temporary Address here
- Does not get over-written with DEERS Sync
- Can navigate from the A/P module by clicking Demographics on Folder List
- After entering number, press 'Save' on top of screen then close.

The screenshot shows a patient information form for SUAREZ, EDUARDO A. The 'Folder List' on the left has 'Demographics' highlighted with a red box. The 'Local Info/Comments' field in the form is also highlighted with a red box and contains the text: (703) 999-9999 Cell Phone
Temporary Address can also go here.

Patient Information

Name: **SUAREZ, EDUARDO A**

SSN: **454-72-3217**

Medicare Eligibility: **N - Not Eligible**

BirthDate: **10 Sep 1961**

Age: **46yo** Sex: **M**

Marital Status:

Race: **Hispanic**

Patient Category: **N11 USN ACTIVE DUTY**

FMP: **20**

Enrollment Facility: **CHCSII-T FACILITY**

Facility Description: **CHCSII-T FACILITY**

ACV/Enrollment Status: **Not Recorded**

Home Address: 233 Main St

State/Country: VA Zip: 12345

Email: eduardo@chcsii.com

Home Phone: 123 - 888 - 8888

Work Phone: 123 - 444 - 5555

Religion:

Local Info/Comments: (703) 999-9999 Cell Phone
Temporary Address can also go here.

Command Interest:

Command Security: **N**

Making it Legible

Free text in Subjective (i.e. Visit For) and Plan (i.e. Comments)

- Free text at the top of the note. “Visit for” or “Encounter Background”
 - Positive Symptoms in HPI (and pertinent negatives)
 - Only negatives in ROS
 - Filled in bullets means abnormal findings; and in PE – abnormal findings list first
- Free text Comments in A/P

The screenshot displays a medical software interface for a patient visit. The top bar shows the patient's name 'SD - ami visit cold v2.0' and various tool icons like 'AutoNeg', 'ROS/HPI', 'History', 'FamHist', 'Prompt', 'I Prompt', and 'ListSize 1'. Below this, the 'Entry details for current selection' section shows 'dianthea' with fields for 'Duration (numeric)', 'Onset', and 'Modifier'. The main area is divided into two panes. The left pane, titled 'Templates (Diagnoses, Syndromes And Conditions)', lists various symptoms with checkboxes and colored indicators (blue for negative, red for positive). The right pane, titled 'Reason for Visit', contains a structured note with sections for 'Reason for Visit', 'History of present illness', 'Review of systems', and 'Systemic symptoms'. The note text is as follows:

Reason for Visit
[Visit](#) for: Pt has had flu like symptoms on and off for the past week. Main symptom is a sore throat. Using OTC Nyquil at night.

History of present illness
The Patient is a 45 year old female.
• [Nasal](#) discharge • [Sore throat](#) for 7 days
• [Cough](#)
◦ [No fever](#)

Review of systems
Systemic symptoms: [Not feeling](#) tired or poorly and [no chills](#).
Head symptoms: [No headache](#) and [no sinus](#) pain.
Otolaryngeal symptoms: [No nasal](#) passage blockage and [no sneezing](#).
Pulmonary symptoms: [Not feeling](#) congested in the chest and [not coughing](#) up sputum.
Gastrointestinal symptoms: [No nausea](#). [No vomiting](#).

ROS / HPI Flip

AIM Form

Consults

Copy as New

- Patient shows up needing new consult because previous one expired
- If you see it below as an Active Consult
- Right click, select Copy as New, modify No of Visits, then Submit

The screenshot shows the 'Order Consults' window with the 'Active Consults' table. A right-click context menu is open over the 'Copy As New' option. The table contains the following data:

Date Ordered	Primary Dx
22 Mar 2008 0000	DIABETES MELLITUS TYPE II

Edit Reason for Request, Change No of visits or Authorization Date, then submit.

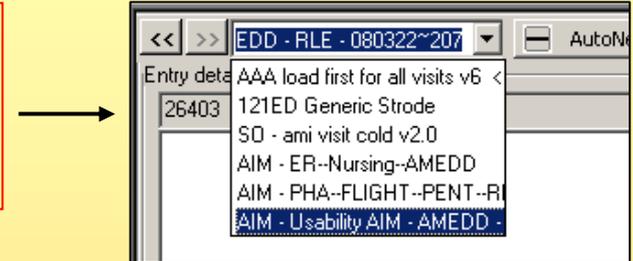

Right Click,
Select 'Copy as new'

The screenshot shows the 'Order Consults' window with the 'Copy As New' form. The 'No. of Visits' field is set to 3 and the 'Auth. Until' field is set to 22 Apr 2008. The 'Reason For Request' field contains the text: 'Having difficulty with control of patient's blood sugar. May require insulin. Evaluate and treat by internal med.' The 'Provisional Diagnosis' field contains the text: 'DIABETES MELLITUS TYPE II - UNCONTROLLED'. The 'Submit' button is highlighted.

Template Strategy

Keep Favorites List of Templates to a **MINIMUM**

Delete or remove everything else

Core Templates You Need, nothing more, nothing less...

1. **Default Template** (list template*)

Items not on an AIM Form +
A/P Items

2. Well Visit Templates**

3. Procedure Templates

4. Your 80-90% Template

Ex. **“Usability AIM”** Form

5. Most commonly seen Diagnoses
(several times per day) Templates
(optional)

Ex. Cold (URI) Template

* List template for S/O Medcin terms. When 3.3 is released, there is an argument for not including an AIM Form as your default template.

** Ex. Well Woman (Pap), School, Flight, PHA and General Physicals, Pediatric Well Visits, etc...

How your Workload is Measured

If you're productivity is measured by RVU's, then you should know the rules of the game.

A provider's RVUs are determined primarily by 2 components:

- The E&M (Evaluation and Management) Code
- And Procedures (CPT and HCPCS codes)

Sample E&M RVU Numbers

- New vs. Established (more points for new patients)
- Primary Care and Family Practice are DIFFERENT clinics.
- E&M Codes

	New/EST
– 99212 (Prob Focused)	0.45/0.45 RVU
– 99213 (Expanded Prob Focused)	0.88/0.67 RVU
– 99214 (Moderate Complexity)	1.34/1.10 RVU
– 99215 (High Complexity)	2.67/1.77 RVU
– 99381/91 (Prev Med 0-1 yo)	1.19/1.02 RVU
– 99382/92 (Prev Med 1-11 yo)	1.36/1.19 RVU
– 99385/95 (Prev Med 18-39 yo)	1.53/1.36 RVU
– 99386/96 (Prev Med 40-64)	1.88/1.53 RVU

What About Procedures?

- Correct documentation of procedures are ESSENTIAL!
- Procedure RVU's are added to the E&M code
- Ex: Visit for impaired hearing
(E&M 99213 RVU = **0.67**) + ear wax removal (RVU = **0.61**). **TOTAL = 1.28 RVU**
- IMPORTANT: Providers can receive credit for procedures done by ancillary staff.

The screenshot displays a medical software interface. The top section shows a table with columns for Priority, ICD, Diagnosis, Chronic/Acute, and Type. The first row is highlighted with a blue background and contains the following data: Priority 1, ICD 380.4, Diagnosis CERUMEN IMPACTION, Chronic/Acute Acute, and Type New. Below this table, there is a section for Plan/Comments and Procedure(s), with Cerumen Removal listed under Procedure(s). To the right of the table is a Priority control with up, down, and left-right arrow buttons. Further right is a section titled Orders & Procedures, which currently shows Cerumen Removal.

Below the main table is a navigation bar with tabs for Diagnosis, Order Sets, Procedure, Reminders, Order Consults, Order Lab, Order Rad, Order Med, and Other Therapies. The Procedure tab is selected. Below the navigation bar is a search area with a dropdown menu set to 'AAA load first for all visits v6 <D', a 'Favorite Lists' button, and radio buttons for 'Standard Procedures (CPTs)' (selected) and 'HCPCS & Durable Med Equip (DME)'. A search box and a 'Find Now' button are also present.

At the bottom, there is a section titled 'Description of Procedures' containing a list of procedure descriptions and codes:

- SCREENING PAP OBTAIN, PREP, CONVEY CERV/VAG SMEAR TO LAB Q0091
- Electrocardiogram 93000
- Dr. Supervised Injection Intramuscular 90772
- Dr. Supervised Injection Intramuscular Antibiotic 90772
- Destruction Of Flat Warts By Cryosurgery Up To 14 Lesions 17110
- Biopsy Skin 11100
- Pulmonary Function Tests Peak Flow 94150
- Surgery Of Male Genitalia Vasectomy 55250
- Fiberoptic Examinations Sigmoidoscopy 45330

What About Procedures?

A Properly Coded Well Woman Exam can yield big RVU's:

- E&M Prev Med visit (99395) = **1.36** RVU
- Procedure: Screening Pap Smear (HCPCS Q0091) = **0.37** RUV
- **Total = 1.73 RVU** for a 30 minute appt.

The screenshot shows a software interface with several dropdown menus and a table. The 'Service Type' dropdown is open, showing options like 'Outpatient Visit', 'Prev Med - Admin / Assess', 'Prev Med - Group Couns', 'Prev Med - Individ Couns', 'Prev Med - Other', and 'Prev Med Eval / Mgt'. A red arrow points to the 'Prev Med Eval / Mgt' option. The 'Patient Status' is 'Established Patient' and 'Exam Type' is 'General Multi-Sy'. There are also 'HPI' and 'Default Calculation' sections.

Note on Prev Med Visits:

A 99214 (Outpt visit, existing patient) = 1.1 RVU

A 99395 (Prev Med visit, existing patient) = 1.36 RVU

A 26% RVU increase!!!

Annual Preventive (Well) Visits:

Prev Med Eval/Mgt must be selected manually in 838. In AHLTA 3.3, will be automatic.

Ex. PHA's, Well Woman and Pediatric Well visits.

Sample Procedure RVUs

- Circumcision 1.81 RVU
- Ear Wax Removal 0.61 RVU
- Excision of Skin Tags 0.77 RVU
- I&D Abscess 1.17 RVU
- Punch Biopsy 0.81 RVU
- IV Fluid, 1 hour 0.17 RVU
- Nebulizer Treatment 0.32 RVU
- EKG Reading 0.17 RVU
- Cryotherapy of skin 0.76 RVU
- Screening Pap by Physician 0.37 RVU
- IM/SC Injection 0.17 RVU
- Oxygen Sat Reading 0.04 RVU

How to put Procedures in the note quickly

1. Have them Listed in your Default Template, as shown.
2. Have them in your Favorites List
3. And... (next slide)

The screenshot shows a software interface with a top navigation bar containing tabs for 'Diagnosis', 'Order Sets', 'Procedure', 'Reminders', 'Order Consults', 'Order Lab', 'Order Rad', 'Order Med', and 'Other Therapies'. The 'Procedure' tab is highlighted with a red box. Below the navigation bar, there is a search section with a dropdown menu showing 'AAA load first for all visits v6 <D', a 'Favorite Lists' button, and radio buttons for 'Standard Procedures (CPTs)' (selected) and 'HCPCS & Durable Med Equip (DME)'. A search input field and a 'Find Now' button are also present. The main area is titled 'Description of Procedures' and contains a list of medical procedures with their CPT codes. At the bottom, there are two buttons: 'Add to Encounter' and 'Add to Favorite List'.

Diagnosis | Order Sets | **Procedure** | Reminders | Order Consults | Order Lab | Order Rad | Order Med | Other Therapies

<< >> AAA load first for all visits v6 <D Favorite Lists

Add to Encounter Add to Favorite List

How to put Procedures in the note quickly

Use of Clinic Favorites for Support Staff

- Most common list of Diagnoses (ex. Normal Pelvic Exam...)
 - Use them to add **Agreed Upon Routine Visits** as a verbal order
- Most common list of Procedures (Think RVU's)
 - Use them to add **Agreed Upon Procedures** as a verbal order

The image displays three overlapping screenshots of a medical software interface, illustrating the process of adding procedures to a note. The interface is divided into several tabs: Diagnosis, Order Sets, Procedure, Reminders, Order Consults, Order Lab, Order Rad, Order Med, and Other Therapies.

The first screenshot shows the 'Diagnosis' tab selected. The search bar contains 'AAA load first for all visits v4.1'. The 'Diagnosis' list shows several entries, with 'V72.31 NORMAL PELVIC EXAM WITH CERVICAL PAP SMEAR' highlighted. The 'Add to Encounter' button is visible at the bottom.

The second screenshot shows the 'Procedure' tab selected. The search bar contains 'q0091'. The 'Description of Procedures' list shows several entries, with 'SCREENING PAP OBTAIN, PREP, CONVEY CERV/VAG SMEAR TO LAB Q0091' highlighted. The 'Add to Encounter' button is visible at the bottom.

The third screenshot shows the 'Procedure' tab selected. The search bar contains 'q0091'. The 'Description of Procedures' list shows several entries, with 'SCREENING PAP OBTAIN, PREP, CONVEY CERV/VAG SMEAR TO LAB Q0091' highlighted. The 'Add to Favorite List' button is visible at the bottom.

What else can your support staff do for you? This is what mine can do for me.

Create a Single Order set for Support Staff

- PAP, KOH, Wet Prep, GC/Chlamydia, Rapid Strep, Throat Cx, UA, etc.
- They may be able to order these in AHLTA as standing orders

It may be possible for your support staff to complete all of this for you

The screenshot shows the AHLTA software interface. The main window displays a patient record with the following details:

Priority	ICD	Diagnosis	Chronic/Acute	Type
1	V72.31	NORMAL PELVIC EXAM WITH CERVICAL	Acute	New

Below the diagnosis, the 'Order Sets' tab is selected, showing a list of procedures:

Select	Modify	Name	Details
<input type="checkbox"/>	<input type="checkbox"/>	PAP	Routine
<input type="checkbox"/>	<input type="checkbox"/>	KOH	Routine
<input type="checkbox"/>	<input type="checkbox"/>	WET PREP	Routine
<input type="checkbox"/>	<input type="checkbox"/>	GC / CHLAMYDIA	Routine
<input type="checkbox"/>	<input type="checkbox"/>	URINALYSIS	Routine
<input type="checkbox"/>	<input type="checkbox"/>	RAPID STREP GROUP A/B	Routine
<input type="checkbox"/>	<input type="checkbox"/>	THROAT CULTURE	Routine

A red box highlights the 'Clinic Order Set' dropdown menu, and a red box highlights the 'Order Sets' tab. A red watermark 'EXAMPLE ONLY' is overlaid on the bottom right of the screenshot.

Chief complaint
 The Chief Complaint is: HIGH BLOOD PRESSURE - pt started med on 10 March/

History of present illness
 The Patient is a 34 year old female.
 * Headache slight headache. pt also has other minor URI symptoms since Mar 9

* No military service IS THIS VISIT RELATED TO A DEPLOYMENT? Y N * No chest pain or discomfort * No dyspnea * No localized soft tissue swelling in both legs

Past medical/surgical history
Reported History:
 Reported prior tests: Blood pressure was high pt reports BP is only high at the dr's. at home BP was normal, 130/90 but pt has noticed a steady increase for the past year. Pt has been on meds for BP previously but after pregnancy meds were discontinued Baby was born Jun 2000

Reported medications: No medication history.
 Medical: No reported medical history. Intermittent hypertension.
 Dietary: No high-fat diet and no high-salt diet.

Diagnosis History:
 No acute myocardial infarction.
 Hypertension.
 No hyperlipidemia.
 No diabetes mellitus

Personal history
 Behavioral history: No caffeine use and no tobacco use.
 Alcohol: No alcohol use.
 Habits: Poor exercise habits.

Family history
 Family medical history was unknown.

Review of systems
Systemic symptoms: Not feeling tired or poorly.
Eye symptoms: No eyesight problems.
Otolaryngeal symptoms: Epistaxis from the right nostril and with anterior drainage when pt blew her nose yesterday morning

Cardiovascular symptoms: No palpitations.
Pulmonary symptoms: No cough.
Genitourinary symptoms: Urinary symptoms while taking HCTZ.

Neurological symptoms: No lightheadedness, no dizziness, and no fainting.

A/P:
 Disposition
 AddNote

BTW: Actual Technician Note

This is what my screener did for me. Patient here for f/u HTN visit.

Yes, most can do this.

No one else will show them how to do this unless you do. You have to show them how.

If they can't, then get your Nurses more involved.

Demonstration of the “Usability AIM”

You may

~~Beware!~~ ...~~Don't~~ try this at home 😊

Available to all now in 838 and will work in 3.3

No extra software, gadgets, or gimmicks required.

Instructions to find it at back of this presentation.

Disclaimer:

Defaulting this template not recommended ...takes longer to load

Add it to your favorites, do not try to re-save it... it won't work.

Please check periodically for updated versions by searching “Usability”, and adding in the most recently dated Usability AIM Form

DSMA right here gets you an Extended HPI

Rules for HPI. Brief, (1-3) and an Extended HPI consists of at least **4** of 8 elements from the list.

Past, Social and Family Hx have 2 potential levels (pertinent and complete). A pertinent contains at least 1 type of history (Past, Social or Family).

Tip:

Remember DSMA:

D = Duration

S = Severity

M = Modifying Factors

A = Associated Sx's

DSMA Makes sense on every patient with a chronic disease. And easily done on all visits.

Ex1. Extended HPI: Diabetes for 6 years. He is on oral medications. He is taking his medications, exercising and watching his diet. He has some tingling, but no numbness in his feet.

Ex2. Extended HPI: Patient complains of dull ache in right ear over the past 24 hours. Patient states he went swimming two days ago. Symptoms somewhat relieved by warm compress and Tylenol.

Note: Boxes above are for additional free text entry only, and will not automatically display in Auto-Cites or patients longitudinal Health History. Use Medication module, Problems module, Historical Procedures module, and Family History module to update items below.

Note: 95/97 coding guidelines say your staff can enter this for you.

You can click these boxes to indicate you reviewed the patient's past history, or you can click them to free text these items.

- On **Est.** Patients, at least one of these boxes must be clicked for a 99214 level. A 99213 level code does not require any.
- On **New** Patients, all **3** (PMH, Soc Hx and Family Hx) are required.
- Should be a clinically pertinent review item to count.

Past, Social and Family Hx have 2 potential levels (pertinent and complete). A pertinent contains at least 1 type of history (Past, Social **or** Family). A complete for a new patient requires all 3 types of history (Past, Social **and** Family) to be documented.

For Established Pts
2 of 3 components are required to meet the level for that visit.

For New Pts
All 3 are required

Note to self: 99213 visit with Earwax removal Procedure = 1.28 RVUs

So what is a 'bullet' in the PE section?

A bullet is a body part examined, but are only counted when they fall under specific bolded areas below, and only 1 is counted per section.

For example: The examination of the eye, a maximum of 3 bullets may be obtained. For ENT, six are obtainable, and so on.

Note: Checking NL Conjunctiva, NL Sclera, and NL Eyelids gives you 1 for the eye. But, NL Sclera and NL Optic Disc gives you 2, etc.

Surface in AIM Form

Demonstrate Copy Forward follow up using this Form

Steps:

1. Use this Form to Document
2. Open New f/u Note
3. Go to Previous Encounters and find Note to copy forward
4. Press 'Copy Forward' button
5. Go to S/O, **Click on the yellow items** to add to current visit.
6. Then **Load Usability AIM Form**, and edit.
7. Complete any new information into note.

Here's the rest of the Form

The screenshot shows a software interface with a menu bar at the top containing options like '<<', '>>', 'AIM - MOAAF Long~141', 'AutoNeg', 'Undo', 'Details', 'Browse', 'Shift Browse', and 'Note View'. Below the menu bar is a row of tabs: 'HPI / Screening', 'RDS', 'PE', 'Musculoskeletal (upper)', 'Musculoskeletal (lower)', 'Well Woman', 'PFTs/EKG', 'Procedures', and 'Outline View'. The main area displays a list of body parts, each with a double arrow button to its left: 'Head', 'Neck / Back / Spine / Pelvis', 'Shoulder', 'Elbow', 'Arm / Forearm', 'Wrist', 'Hands', and 'Fingers'. A red arrow points from a text box to the double arrow next to 'Neck / Back / Spine / Pelvis'.

If you want to document a back exam, click the double arrow next to Neck/Back/Spine/Pelvis.

GXT

Cardiovascular Stress Test

Reason for test:

Informed consent was obtained.

The pt exercised according to the Bruce protocol for ____ minutes. His resting heart rate of ____ bpm rose to a maximal heart rate of ____ bpm. This value represents ____% of his maximal age predicted HR. The blood pressure at rest was ____mmHg and rose to a maximum blood pressure of ____mmHg. The exercise test was stopped due to ____.

Summary:

Resting EKG:

Functional capacity:

HR response to exercise:

BP response to exercise:

Symptoms/Chest pain:

Arrhythmias:

ST changes:

Mets achieved:

Overall impression:

Negative or Positive Stress test.

Max (=85% Max HR) or submax (<85% Max HR) stress test.

Conclusion: Unremarkable GXT, low risk for CAD, no further cardiac testing necessary.

Procedure codes: use both 93016 and 93018
(unless your department owns the equipment, then use procedure code 93015)

<< **PUNCH BIOPSY**

PUNCH BIOPSY

The procedure was explained in detail and informed consent was obtained from the patient. The area was prepped and draped in a sterile fashion, and infiltrated with 1% lidocaine with epinephrine for local anesthesia. A ___ mm punch biopsy was used to remove the lesion, and the specimen was placed in placed in specimen jar and sent for analysis. Closure was performed with ___ simple interrupted sutures using ___ type of suture. Antibiotic ointment and a bandage were applied. EBL was less than 1cc. Good hemostasis. There were no complications. Wound care and post-procedure warning signs were discussed. Pt voiced understanding. I instructed the patient to follow up for fever, erythema, swelling, pain, or purulent discharge from the wound. The patient voiced understanding. Suture removal in ___ days.

<< **SHAVE BIOPSY**

SHAVE BIOPSY

The procedure was explained in detail and informed consent was obtained from the patient. The area was prepped and draped in a sterile fashion, and infiltrated with 1% lidocaine with epinephrine for local anesthesia. Forceps were used to elevate the lesion and a shave biopsy was performed. The specimen was placed in a specimen jar and sent for analysis. Drysol solution was used for hemostasis. Antibiotic ointment and a bandage were applied. EBL was less than 1cc. Good hemostasis. There were no complications. Wound care and post-procedure warning signs were discussed. Pt voiced understanding. I instructed the patient to follow up for fever, erythema, swelling, pain, or purulent discharge from the wound. The patient voiced understanding.

EXCISIONAL BIOPSY

EXCISIONAL BIOPSY

The procedure was explained in detail and informed consent was obtained from the patient. The area was prepped and draped in a sterile fashion, and infiltrated with ___ cc of 1% lidocaine with epinephrine for local anesthesia. An elliptical excision was performed to remove the lesion/mass, and the specimen was placed in specimen jar and sent for analysis. Closure was performed with ___ simple interrupted sutures using ___ type of suture. Antibiotic ointment and a bandage were applied. EBL was less than 1cc. Good hemostasis. There were no complications. I instructed the patient to follow up for fever, erythema, swelling, pain, or purulent discharge from the wound. The patient voiced understanding. Suture removal in ___ days.

Peds Preclinical Overprints

- Tailored overprints for visit purpose
 - Acute visits (rash, trauma, acute illness, etc)
 - Annual visits (screening tests)
- Family can access overprints from our clinic's website
- The overprint includes vital signs, vaccines, etc.
- Allows for a “peak at the chart” prior to entering the exam room
- Examples:

A screenshot of a file list containing various pediatric overprint documents. The files are listed in a vertical column, each preceded by a small document icon. The list includes:

- 1 YEAR WCC.doc
- 2 MO WCC.doc
- 2 WEEKS WCC.doc
- 2 YEAR WCC with MCHAT AUTISM SCREEN.doc
- 3 YEAR WCC.doc
- 3-5 DAY WCC.doc
- 4 MO WCC.doc
- 4 YEAR WCC.doc
- 5-6 YEAR WCC.doc
- 6 MO WCC.doc
- 7-11 YEAR WCC.doc
- 9 MO WCC.doc
- 12-17 YEAR WCC.doc
- 18 MO WCC with MCHAT AUTISM SCREEN.doc
- ACUTE FINAL (SPANISH VERSION).doc
- ACUTE FINAL.doc
- ADD ADHD FOLLOW-UP VISIT.doc
- ADD ADHD INITIAL VISIT.doc
- ASTHMA FOLLOWUP VISIT.doc
- INJURY and TRAUMA FINAL.doc
- JCAHO and FHx assessment.doc

Default Technician Template

- The technician's default template coordinates with overprints the patients fill out at arrival to the clinic.
- The technician A/P section includes preventive care, vaccines, smoking counseling, etc.
- Parallel work with provider (immunizations, pulmonary function tests, screening tests may be given if provider is running behind).

SO Note Written by ROHAN, CRAIG A @ 16 Feb 2007 1210 MST

History of present illness

The Patient is a 53 year old male.

* No hearing loss (M-CHAT Question 20: Have you wondered if your child is deaf?) * and No hyperacusis (M-CHAT Question 11: Does your child seem oversensitive to noise (e.g., plugging ears) * Reaction time was not slowed (M-CHAT Question 16: Does your child walk?) * No reluctance to play (M-CHAT Question 4: Does your child enjoy playing peel-a-boo/hide-and-seek?) * No loss of interest in activities (M-CHAT Question 6: Does your child ever use his/her index finger to point, to ask for something?) * No preoccupation with a narrowly focused interest (M-CHAT Question 7: Does your child ever use his/her index finger to point, to indicate interest in something?) * No unreasonable fear of man-made heights (M-CHAT Question 3: Does your child like climbing on things, such as up stairs?) * Not being unresponsive to human contact (M-CHAT Question 2: Does your child take an interest in other children?) * Not being overly passive in a relationship (M-CHAT Question 10: Does your child look you in the eye for more than a second or two?) * Ability to communicate effectively (M-CHAT Question 22: Does your child sometimes stare at nothing or wander with no purpose?) * Not socializing for appearance's sake (M-CHAT Question 12: Does your child smile in response to your face or your smile?) * No problems with a parent or guardian (M-CHAT Question 23: Does your child look at your face to check your reaction when faced with something unfamiliar?) * No selective inefficiency (M-CHAT Question 18: Does your child make unusual finger movements near his/her face?) * No social isolation (M-CHAT Question 14: Does your child respond to his/her name when you call?) * No ritualistic behavior (M-CHAT Question 13: Does your child imitate you? (if you make a face will your child imitate it?)) * No abnormal mannerisms (M-CHAT Question 9: Does your child ever bring objects over to you (parent) to show you something?) * No extreme gregariousness (M-CHAT Question 19: Does your child try to attract attention to his/her own activity?) * No infantile behavior (M-CHAT Question 8: Can your child play properly with small toys (for example cares or bricks) without kust mouthing, fiddling, or dropping them?) * Not less talkative than usual (M-CHAT Question 21: Does your child understand what people say?) * No behavioral problems (M-CHAT Question 17: Does your child look at things you are looking at?) * Not pretending for secondary gain (M-CHAT Question 5: Does your child ever pretend, for example, to talk on the phone or take care of dolls, or pretend other things?) * No failure to develop normal attachment behavior (M-CHAT Question 15: If you point at a toy across the room, does your child look at it?) * No voluntary repetitive behavior (M-CHAT Question 1: Does your child enjoy being swung, bounced on your knee, etc.?)

Default Provider Template

- Provider template includes everything entered by the technician (in a format that is easy to review and/or modify).
- Provider template also includes the physical exam, expanded review of systems as well as links for relevant patient handouts.
- Optimized for dragon dictation
- Provider's A/P section includes weight-based order sets that were set up in conjunction with pharmacy staff (pt safety, pharmacy convenience with bottle sizes, etc.)

Benefits for Peterson AFB Clinic

- The holy grail (the 15 minute appt!)* with an empty clinic at 1635.
- ACCESS: >95% (despite significant provider turnover, MEDRETEs, 2 half-time providers, maternity leave, separations)
- Procedure documentation by technicians and nurses
- RVUs per encounter (0.8 pre-AHLTA, 1.2-1.4 post-AHLTA)
- Part time providers utilization (21MDG/SGH, 21MDG/SGN, AFSPC/SGH), provider ramp-up

6th AHLTA Day

Reminders

From: Craig.Rohan@alumni.usc.edu <craigalan@pol.net>
Subject: Re: Fwd: AHLTA User Conference
Date: June 2, 2008 5:47:20 PM EDT
To: Anthony Inae

Not a problem at all, it will give me more time to outprocess. You are welcome to pass on the message that anyone who would like to visit our clinic (or even just send their techs for a few days) is welcome to. That tech part may sound like a joke but we've had a great experience with a few bases that have sent their motivated techs here to pass the system around. [REDACTED] the pediatrician at [REDACTED] AFB in [REDACTED] told me that she might stay in the AF after being sure that she would get out because of how well the last few weeks have been since we trained her tech. Life will be pretty busy here until August though (I'm PCSing and the clinic is moving to a new facility) so visits after then would be better.

Its been great working with you for the past few years and I sincerely hope that we can get AHLTA working well for everyone.

If I can help you in the next 3 years you are welcome to email me at my civilian email address: craig.rohan@alumni.usc.edu

Take care,
Craig

How to get these AIM Forms, Clinical Overprints and Wt. Based Order Set spreadsheet

- Go into S/O Template Management
- Search for Peds--Multi_Form--AF
 - Right click and add it to your favorites list
- Next, Search for Peds--Support_Form--AF
 - Right click and add it to your favorites list
- Email Me (tony@inae.net) or Dr Rohan (craigalan@pol.net) and we can send you the Clinical Overprints and Pediatric Weight Based Order Sets Excel spreadsheet.

ED Team Workflow

How the 121st CSH ED in Korea does it.

**Selected slides taken from Successful
AHLTA ED Use 121st CSH Pathway**

Developed by Dr Chris Strode and Staff

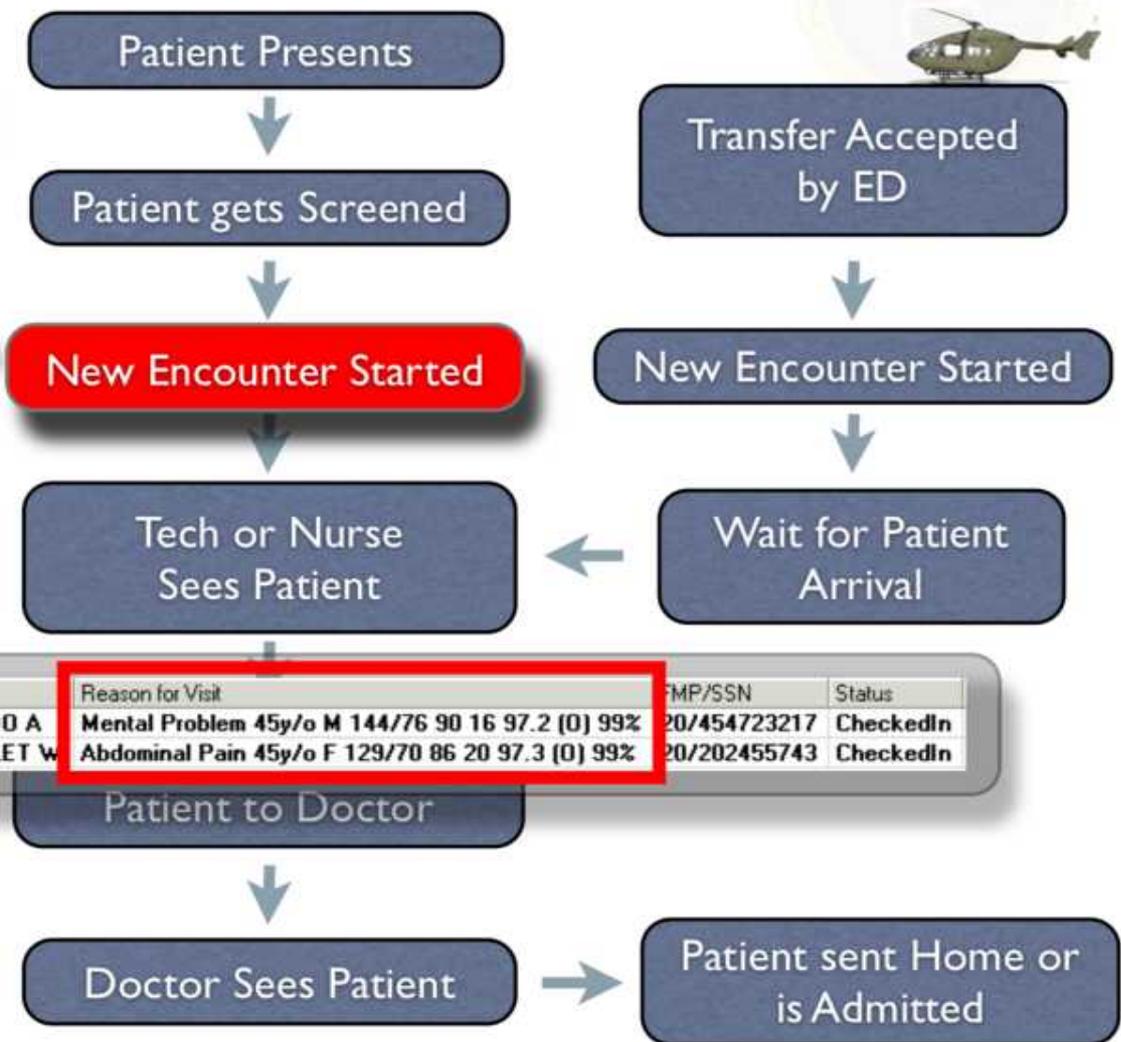

Chris' Contact Info:
Chris Strode, MAJ USA MC
Chris.strode@us.army.mil

General AHLTA ED Workflow

1. Screener creates new appt walk-in
2. Reason For Visit: Types in: chief complaint, age, sex, vitals (This is added for quick triage screening - see example below)
3. Then enters vital signs into vitals module, tobacco, ETOH, pain scale, and allergies verified into AHLTA.
4. Puts current cell phone number in Demographics Comments section (only changes when people change it).
5. Screener **prints page 1** of the AHLTA Encounter containing Autocites (very important - will discuss later), and prints out enough labels approved for lab and scanned material processing.

Example

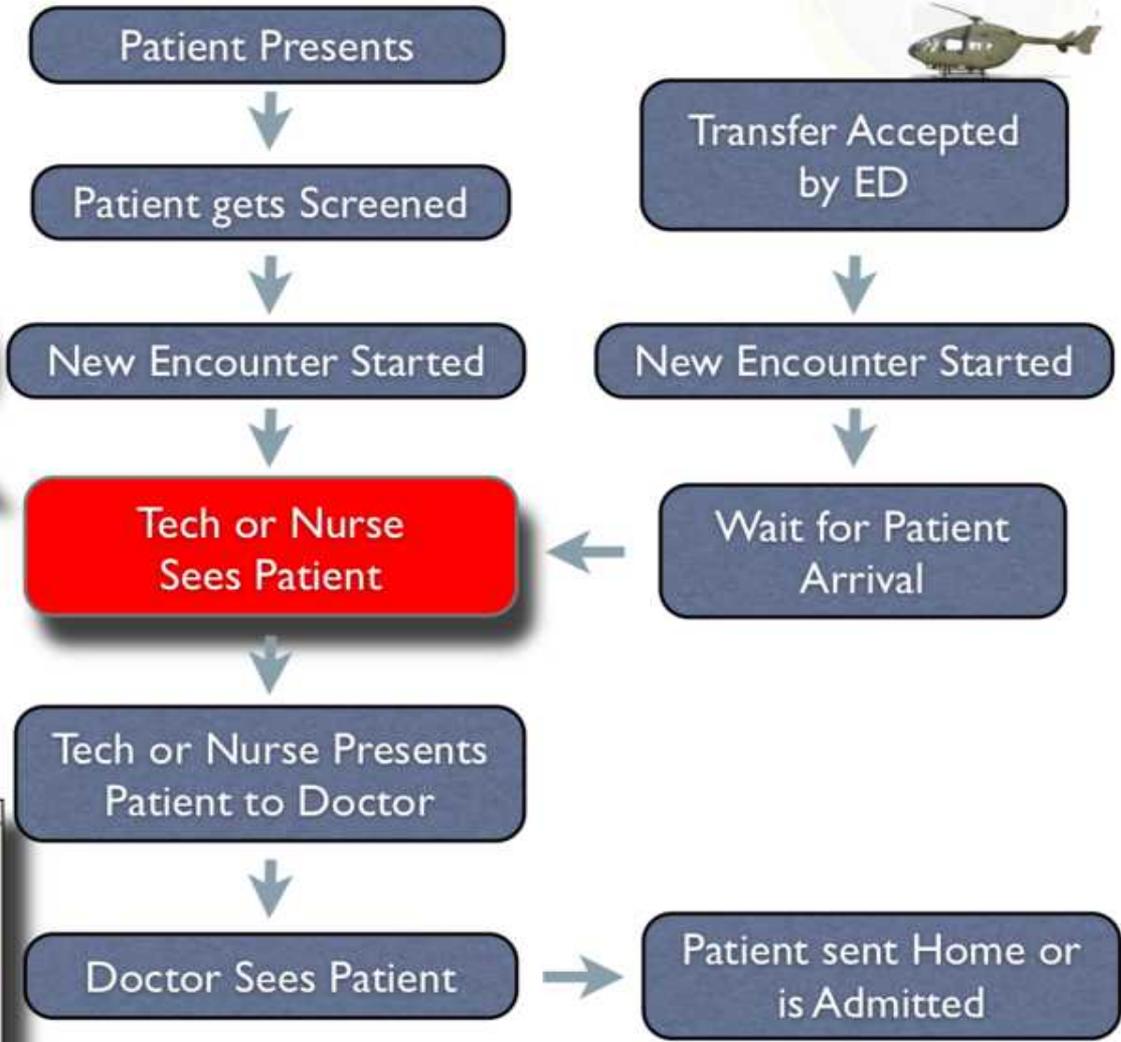

CheckIn Time	Patient	Reason for Visit	MP/SSN	Status
14 Aug 2007 1205	SUAREZ, EDUARDO A	Mental Problem 45y/o M 144/76 90 16 97.2 (0) 99%	20/454723217	CheckedIn
14 Aug 2007 1207	ALEXANDER, VIOLET W	Abdominal Pain 45y/o F 129/70 86 20 97.3 (0) 99%	20/202455743	CheckedIn

General AHLTA ED Workflow

1. Tech (or nurse) sees patient, documents full note.
2. If initial note done by a tech, then nurses take over note using 'Edit-No-Yes' and edits as needed (No nurse uses more than first 3 tabs on ER--Nursing--AMEDD AIM Form). All non-docs use same AIM form and is defaulted for them.

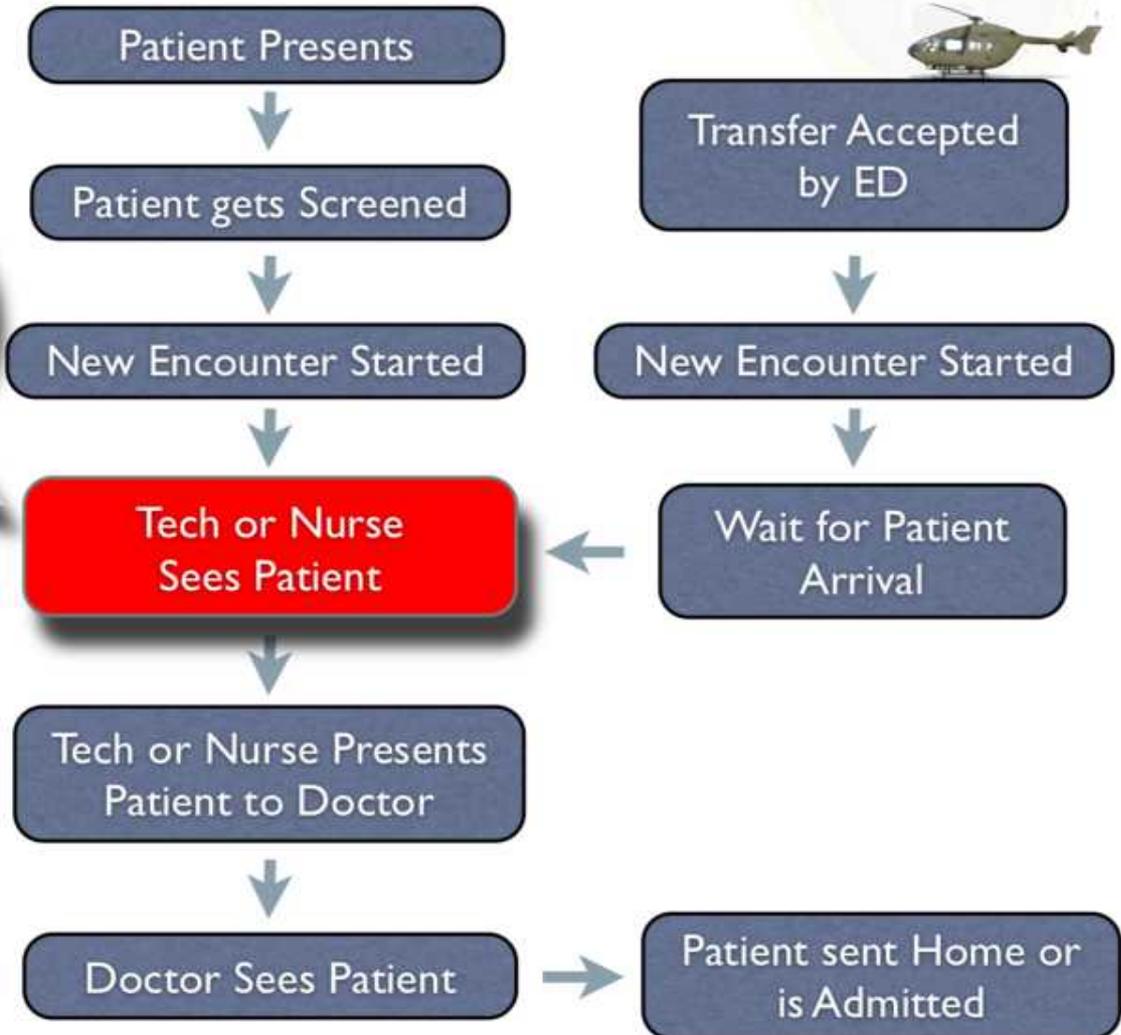

General AHLTA ED Workflow

3. While techs are seeing patient, they cross off (with a pen) 'not taking' meds on that **printed page I** of AHLTA encounter, verify PMHx, add PSurg Hx, and checks allergies.

4. Then adds this information to AHLTA into various modules, i.e. Problems Module for PMH, PSurg Hx, Medications (as an OTC in free-text field in the meds module), and Allergies Module.

5. By this time, all administrative things for the chart are complete.

General AHLTA ED Workflow

1. Nurse or Tech presents patient to doc.

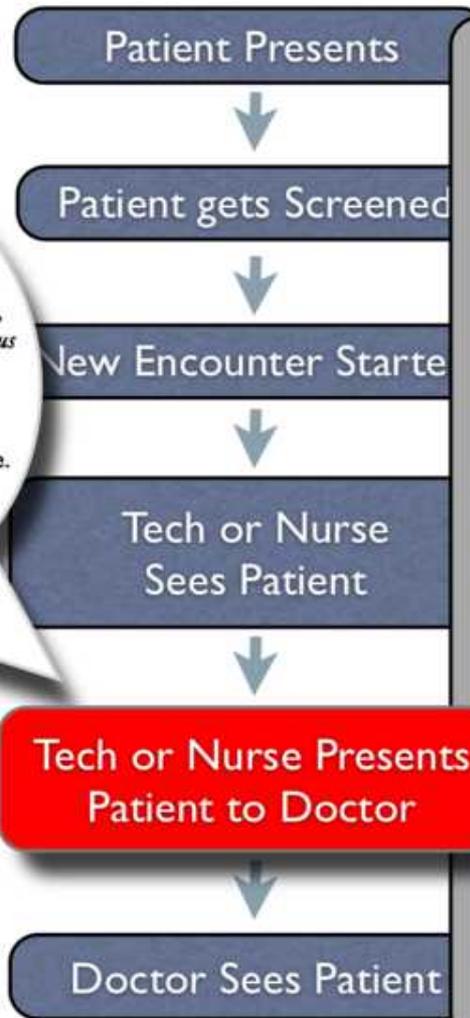

2. If doc decides to order labs prior to seeing the patient, doc directs staff to order labs off specific 121EDZSET templates or Common Encounter Templates.

Examples of EDZSETS are "121EDZSET-ABD" (has an acute abd series, cbc, c20, amy, lip, ua, bcg on it), "121EDZSET-FEM" (abo rh, ua, bcg, bcg quant, wet prep, koh, gc), "121EDZSET-TRAUMA" (abd set plus lat c-spine, ap chest, ap pelvis, abg, coags, troponin), "121EDZSET-PSYCH" (has abd set labs plus some psych specific requested labs), "121EDZSET-CARDIAC" (abd set plus card enz).

3. Doc just says, "OK, get the cardiac set on the pt" and it gets done. Docs don't enter into AHLTA, these are done as a verbal - for speed, the support staff does this.

4. There is a kiosk Terminal that techs / nurses can use to put in orders or document while standing.

Kiosk Terminal at standing height

General AHLTA ED Workflow

1. Doctor sees patient, writes down orders (with a pen) for the nurses on that same **printed page 1** of AHLTA and hands to the nurse.

Nurses order these via AHLTA.

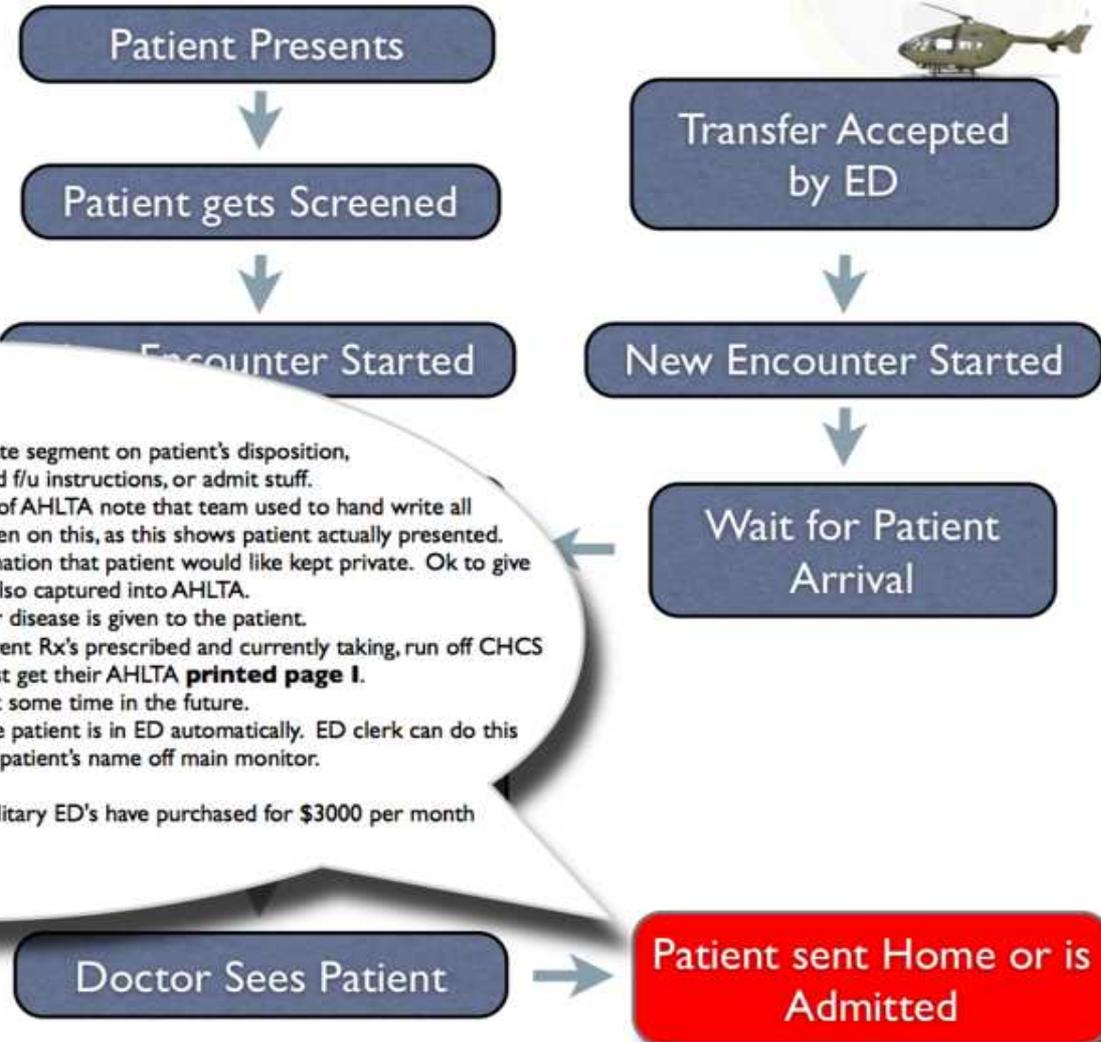

2. Doctor types in free text HPI (using defaulted template "121ED generic stroke" (or other personalized general default template), then clicks off appropriate ROS / PE.

3. Diagnosis is added from Common Dx List (on template) and plan using free text under diagnosis comments.

4. Order sets (EDZSETS) are used for common meds.

General AHLTA ED Workflow

Next Report Note: Patient to be admitted to the [INCLINITE] discussion room completed in the Emergency Department and patient report given to [Nursing] [TITLE OF CHARGE NURSE] the Charge Nurse. I MADE the BATTERY was used for repair. All questions answered and accepted what about they were ready to receive the patient. Patient taught about plan of care, had all questions answered and verbalized understanding. All patient assessments with patient at time of admit. Patient is in [English] [AC] [condition]. Patient was transported via [ambulance] with hospital and prepared to transfer patient. At time of transfer for admit that [sign] [note] on noted above. Patient ready for transfer at time of admit.

1. Nurses place a paragraph long copy / paste segment on patient's disposition, ambulation status, pain scale, understood f/u instructions, or admit stuff.
2. Patient goes home with that initial **printed page 1** of AHLTA note that team used to hand write all changes / orders / notes, etc. Quarters are also hand written on this, as this shows patient actually presented. For HIPAA concerns, can copy off diagnoses and other information that patient would like kept private. Ok to give this, because all information was also captured into AHLTA.
3. An ED ExitWriter* handout on their disease is given to the patient.
4. An SF508 is given to patient. (An Ad hoc that shows the current Rx's prescribed and currently taking, run off CHCS database). If the changes are minimal, they just get their AHLTA **printed page 1**.
5. Doc signs AHLTA encounter at some time in the future.
6. Medics enter discharge vitals or vitals at top of hour while patient is in ED automatically. ED clerk can do this (all but temp) by looking at monitor and patient's name off main monitor.

* ExitWriter is an extra program that most military ED's have purchased for \$3000 per month

Subject: JCAHO

Med and Chart Reconciliation (MCR) Success Requires Strong Leadership

ED Staff -- In support of JCAHO, the hospital command, and our ability to get 3rd party payor billing, there is going to be a change in check-in procedures.

KSC's/Mr Chon -- When a pt checks in, please log them in as usual and then print out the FIRST sheet of the AHLTA record (you may need to hit the autocite button if nothing shows up) and give that to the nurses.docs.

Docs: 1) When you see a pt, please cross out items that you want removed from the Master Problem List and add items that you want added.

2) This includes Medical Problems (in the left column), Surgeries in the Middle Column and Allergies in the right column **See example below**

3) Docs -- please delete meds using the 'meds' icon on the 'folder list' that the pt is *no longer currently taking*. The goal is to only have meds on there that the pt is *currently* taking -- not all that they *have* taken. This is called medication reconciliation and has to be done. I will show you how to do it.

4) Please write somewhere in the A/P (in comments under diagnosis) 'MCR' for **Medications & Chart Reconciled** OR write it in your S/O as an automatic fill should you use S/O Templates.

5) The medication reconciliation has to be done before the chart is closed otherwise you can't do it.

6) For ambulance transfers, please continue either a) writing your accept note on the pts open record or b) starting a new pt encounter with your S/O accept note on it (just a reminder -- nothing new).

Nurses/Medics: Please add OTC's/Herbals to the meds list above ('meds' tab on the 'folder list'). This will ensure it is autocited from one visit to the next. SIG is not your signature but the SIG CODE - T1 tab po bid -- as an example. Also, that long list that CPT Schwartz keeps emphasizing on the 'JCAHO' page needs to be done and complete for each visit.

KATUSA's: PVT Oh, PVT Jo: We will place these sheets in a stack in the tray next to the printer at the nurses station. Please make the corrections to the AHLTA record when you start shift or during a shift. The pt does not have to be logged in to edit/add the 'Problem List' or the 'Historical Procedures' list. Please place in the blue recycle bin when done.

Mr Yim: Can you please make sure the KSC's are all aware of this?

ED Staff -- this will be a small chunk of the changes to come. Most we already do and excel at. The good charting we already do will take us a long ways towards passing our small section of JCAHO. Thankyou for your continued support and your overall excellent care.
MAJ Strode

History of present illness:
 The patient is a 29 year old male.
 * Encounter Background information: PT SP/ APPENDECTOMY BY I ON THE 1ST AND SINCE HAS HAD GRADUAL DECREASE IN ABDOMINAL PAIN BUT FULLNESS ON RIGHT LOWER QUADRANT AND PAIN IN RIGHT FLANK AREA. IN LAST 12 HOURS HAS HAD FEVERS TO 102 AND SWEAT/SHAKES AND WITH MULTIPLE EPISODES OF BLOODY STOOLS (BFBP). SENT FROM LOCAL CAMP.
 * Fever * Chills
 * Nausea with vomiting * Abdominal pain

Review of systems:
Head symptoms: No headache
Otolaryngeal symptoms: No nasal discharge and no throat pain
Cardiovascular symptoms: No chest pain or discomfort
Pulmonary symptoms: No dyspnea
Genitourinary symptoms: No changes in urinary habits.
Neurological symptoms: No neurological symptoms ALL OTHER ROS NEGATIVE AS STATED.

Physical findings:
General appearance:
 * Normal Pt is AJO, well hydrated, healthy, and in NAD. Pain reviewed with pt. Vitals and Nursing note reviewed/acknowledged. PMHx, PSHx, Rx, All rev'd and updated in AHLTA master problem list. Rx corrected as above and per current limitations of AHLTA. If there is a med change, an updated medlist will be given upon release from the ED.

Head:
 * Normal NCOT. NO JVD. OP CLEAR MOIST. NO GGMZ

Lungs:
 * Normal CTA BILAT. NO RETRACTIONS. RR appropriate for age. NO WHEEZES, RHONCHI, RALES

Cardiovascular system:
 * Normal REGULAR RATE BRHYTHM WITHOUT MURMURS/RUBBS/GALLOPS. NORMAL CAP REFLL

Beck:
 * Normal NO CVAT. NO OBEV STEP-OFFS, DEFORMITIES

Abdomen:
 * Normal PAIN RIGHT AND LEFT LOWER QUADRANT. NO REBOUND/GUARDING. NO CVAT. RECTAL WITH GROSS CLOTTED BLOOD. NO PAIN WITH BED BUMP. NO PAIN WITH WALKING. SWEATY AND WARM TO TOUCH

Skin:
 * Normal NO RASH ON EXPOSED AREAS, NO ERYTHEMA

Musculoskeletal system:
 General/bilateral: * Musculoskeletal system: normal FROM OF ALL EXTREMITIES AND PAINLESS. NO MUSCULAR PAIN. NO OBEV JOINT PAIN

Neurological:
 * System: normal MOVES ALL EXTREMITIES. GAIT GROSSLY NORMAL. ALERT AND ORIENTED. APPROPRIATELY INTERACTIVE. CNS 12/AT. NL. SPEECH/THOUGHT PROCESS

Disposition Last updated by CHRISTOPHER A @ 15 May 2007 08:26 KST

Admitted Comments: to the OR

Discussed: Diagnosis, Medication(s)/Treatment(s), Alternatives, Potential Side Effects with Patient with indicated understanding

Administrative Options: Consultation requested

60 minutes face-to-face/face time. >50% of appointment time spent counseling and/or coordinating care.

Note Written by CHRISTINE J @ 14 May 2007 20:00 KST

Admit note

Report given by CPT Fowler prior to shift change, ADMIT REPORT NOTE: Patient to be admitted to the [MCU/UNIT], discussed care completed in the Emergency Department, and patient report given to [Detienne, LT/TITLE OF CHARGE NURSE], the Charge Nurse. "I PASS the BATON" was used for report. All questions answered and accepting ward stated they were ready to receive the patient. Patient taught about plan of care, had all questions answered and verbalized understanding. All patient possessions with patient at time of admit. Patient IV to [right/left ac] patent/intact. Patient was transported via [Stretcher] with hospital staff present to transfer patient. At time of transfer for admit Vital Sign were as noted above. Patient stable for transfer at time of admit.

Note Written by CHRISTINE J @ 14 May 2007 20:04 KST

medication

2040 PT ICRallergies verified, medicated Levaquin 500mg IVPB, pt tolerating well, no reaction noted

Note Written by MICHELLE R @ 14 May 2007 14:19 KST

on arrival to brought to room #2, bilateral 18 gauge IV's NS infusing, pt placed on gown, siderails up x2, labs sent including type and screen, VS taken, ambulated to BRP w/ite assist.

1360 lyelof 1 gram PO x1 for fever 102, 1 rectal escorted to x-ray via wheelchair

1510 pt started drinking oral contrast, allergies verified, no adverse reaction except nausea.

1610 regimen 10mg IVP given for nausea

1625 pt vomitted while drinking contrast about 150cc emesis, MDV CT Aware

1720 pt escorted to CT scan to via wheelchair/ surgeon aware of case.

1825 General surgeon at bedside

1850 fagyl 500mg IVPB over 1 hour infusing, allergies verified, report given to CPT Conser

1905 pt sent to x-ray for IVP

1930 crossmatch for 2 units sent and confirmed with Lab, will call MCU with STAT blood.

1930 report called to LT Lennie at MCU, verbalized understanding of report, VSS, transported via wheelchair, bilat AC patent.

From: "Strode, Christofer A MAJ 121 General Hospital" <chris.strode@us.army.mil>
Date: August 2, 2006 6:17:00 PM EDT
To: "Inae, Anthony \ (Integic\)" <anthony_inae@chcsii.com>
Subject: **AHLTA & Helicopters**

Well, you guys just saved the US Government \$1200 plus flight crew safety.

Dr Clarkson got a call last night for pregnant vaginal bleeding and pain and our most worrisome diagnosis is r/o ectopic pregnancy. There are a bunch of these troops next to the DMZ that are getting pregnant all the time and getting flown down here to the 121 so we can do an U/S to determine ectopic vs nl pregnancy.

(And a decent amount exsanguinate in the ED – talking LITERS of blood out)

Well, Clarkson looked at a clinic note from OB/GYN in AHLTA that said she already had a normal pregnancy. Flight crew was diverted, pt seen asap basis following day instead of emergent nighttime medevac.

Chris

Subject: **AHLTA had a save (UNCLASSIFIED)**

Classification: **UNCLASSIFIED**

Caveats: NONE

Tony -- Despite thoughts that this kid had a simple falling injury by our ED Doc, he didn't find any well baby visits in AHLTA and suspected non-accidental trauma (NAT)/abuse due to neglect issues. Sure enough, that was what the kid had. Admitted for a skull fracture and investigations were underway with CID and SW. All because the doc thought of the disease AND had access to previous medical records via AHLTA. Since, the child and dad have had at upwards of 10-15 pediatric and SW visits.

One kids life saved as a significant number of these kids go on to be killed or significantly maimed by their parents. Good work for an excellent product!

Chris

A/P Last updated by BADEN, ERIC Y @ 26 Feb 2007 0003 KST

1. CONTUSION WITH INTACT SKIN SURFACE - HEAD RIGHT SIDE: CT head limited sec to motion artifact but there appears not to be a skull fracture. pt NVI at baseline. suspect that injury fits mechanism and doubt NAT. however review of medical records shows that pt has not received routine well baby visits so concern for neglect

Dr Meza-Valencia (Peds) saw pt in ER and initiated required neglect protocols by contacting social work and CID. pt was admitted to MCU in good condition

Dad was informed of need to admit pt and appeared to understand

The screenshot shows a software interface for managing templates. At the top, there is a search bar with the text "usability" and two buttons: "FindNow" and "Folders". Below the search bar, the word "Templates" is displayed. The main area contains a list of templates. The first two items are "vst--gyn exam2--idj (CMN FAMILY PRACTICE BGAT)" and "vst--vasectomy--idj (CMN FAMILY PRACTICE BGAT)". Below these are three expandable sections: "Personal Templates", "M FP BLUE TEAM CLINIC Templates", and "Name Search (25)". The "Name Search (25)" section is expanded, showing a list of templates. The template "Usability AIM FM Procedure (Department of Defense)" is selected and highlighted in blue. A context menu is open over this selected item, listing several actions: "New", "Edit", "Delete", "Load", "Move To Folder", and "Add to Favorites". The "Add to Favorites" option is highlighted with a red rectangular box. A red arrow points from this box to the "Add to Favorites" option in the context menu.

You have returned to the S/O section of your note. Click the down arrow and scroll down to the bottom of your list to find Usability AIM.

These forms will be toward the bottom of your list with other forms called 'AIM.'

Part of the word "Procedures" is cut off, but you can still distinguish it from the other forms.

Usability AIM Form - 080513

Chief Complaint: Reviewed Allergies in Autocite

A brief HPI consists of at least 1-3 of 8 elements from: location, quality, severity, duration, timing, context, modifying factors, and associated signs and symptoms.
An extended HPI consists of at least 4 of 8 elements from the above. An extended HPI can also entail discussing the status of 3 chronic conditions.

Usability AIM FM has the following tabs.
Procedures are now on a separate Usability AIM form, see next slide.

The screenshot shows a medical software interface. At the top, there is a navigation bar with buttons for '<<', '>>', 'AIM - Usability AIM FM Pro', 'AutoNeg', 'Undo', 'Details', 'Browse', 'Shift Browse', and 'Note View'. Below this is a tabbed interface with four tabs: 'HPI/Screening', 'Common Procedures', 'GXT/EKG/PFTs/Others', and 'Outline View'. The 'Common Procedures' tab is highlighted with a red box, and a red arrow points from it to the text in the yellow box below. The main content area is titled 'Usability AIM Form - 080513'. It contains a 'Chief Complaint' section with a text input field and a checkbox for 'Reviewed Allergies in Autocite'. Below this is a paragraph of text: 'A brief HPI consists of at least 1-3 of 8 elements from: location, quality, severity, duration, timing, context, modifying factors, and associated signs and symptoms. An extended HPI consists of at least 4 of 8 elements from the above. An extended HPI can also entail discussing the status of 3 chronic conditions.' Below the text is a large yellow box with a red border containing the following text:

“Usability AIM FM Procedures” has the following tabs. An additional other procedure box has been added for any procedures not covered in the pick list.

 At the bottom of the interface, there are several sections: 'Current Medications' (with text: ': Current medications reviewed and reconciled.'), 'Medical History' (with text: ': reviewed'), 'Surgical History' (with text: ': reviewed'), 'Review of Immunizations' (with text: ': up to date'), and 'Family History (1)'. Each section has a checkbox and a scrollable area.
